ONE Solution

STONE CARE PRODUCTS
For All Natural & Engineered Stone

CLEANERS, POLISHERS & STAIN REMOVERS

CERAMIC TILE CLEANER

A heavy duty detergent for cleaning floors, walls, sanitary ware, interior and exterior decorations made of ceramic, porcelain, gres, clinker, cotto and cement based building materials. Excellent for the removal of cement and grout films, cement stains, white cement, salinity stains, efflorescence, grease and other difficult stains, especially after new installations. Will remove superficial rust stains.

SB-58

SB-58 is a highly concentrated detergent used to clean granite, cement, gres and cotto on building facades. SB-58 is acid-based and can not be used on polished marble and acid-sensitive stones. It will remove certain rust stains. Available in pints, quarts, gallons 5-gallons

PASTE WAX for Natural Stone

Special Paste Wax for Polishing Marbles, Granites, Travertine, Engineered & other natural stones. Emulsion Cera de Pasta

New Product

European Technology USA Compliant

Finally a PASTE WAX (tool kit must) that is packaged in a container that will not leak; the lid will not pop off in your truck when it is hot; has a screw top that keeps the Paste Wax clean and dry; and does not emit harmful vapors! Our PASTE WAX has no carcinogens and it performs better than any competitor brands.

STONE CARE KIT

The NEW care kit for natural stone is a simple, inexpensive way to protect and maintain your investment. Use MultiClean to safely remove the toughest dirt from natural stone. SuperSeal protects the stone from stains. Stone Polish brings out the natural luster of the stone, to be used daily: 12 kits per case.

Refills Available

MANGIA MACCHIA

A premixed poultice that will remove most stains on marble, granite, travertine, limestone, quartz surfaces and other stones. Available in 128 and 640 oz. 16 oz

MULTISTrip

Strips emulsified wax, either natural or synthetic or resin based. Works well to remove old wax from floors & walls. Removes water-based and self-polishing waxes without damaging polished surfaces.

MULTICLEAN

MultiClean is a pH balanced, heavy duty concentrated detergent specifically for deep cleaning stone surfaces without removing the natural shine. May be used on all stones regardless of finish. Available in a 16oz pump spray & 1 quart & 1 gallon units.

ULTRAstripper

for vertical surfaces are heavy duty detergents for the removal of all types of dirt; grease, smog and oily stains. Excellent for the removal of very resistant metallic, acrylic and solvent based waxes from floors and walls. Perfect for the deep cleaning of floors before polishing and for cleaning grout in tile joints and gaps.

MANGIA RUGGINE

"Mangia Ruggine" (Rust Eater) is a rust remover powder/GEL specifically designed to remove rust & rust stains from all lapideous materials (marble, granite, calcareous stones, slate, terracotta & ceramics. Rust Remover GEL comes with a special dispensing nozzle to target the rust stain(s).

IMPREGNATORS/SEALERS/RESTORATION

SUPERSEAL

SuperSeal absorbs deeply into the stone, repelling oil & dirt, water stains, and efflorescence, while letting the stone breathe. The natural color of the stone remains unchanged. Does not leave an unsightly plastic looking finish. ODORLESS. Available in pints, quarts, gallon, 5-gallon units.

SUPERSEAL CE

SuperSeal CE is a color enhancing impregnator that penetrates deeply into the stone while allowing the stone to breathe. Protects against oil, water stains, dirt and efflorescence and is available in 1 quart gallon, 5-gallon units. New pint size units.

EDGE DARKENER

Clear impregnating & darkening agent for the color enhancement and protection of stone edges & surfaces. Ideal for use on resinated slabs. Penetrates deeply into the stone, enhancing the color, giving the stone a natural sheen or luster. Protects against penetration of water, oil, grease & humidity. High resistance to UV Rays. Also prevents the formation of mildew. Can be used indoors or outdoors on all types of stone. Available in 1 quart & 1 gallon units.

PAVER DARKENER

Clear impregnating and darkening agent for MAXIMUM color enhancement on stones, stone pavers, other pavers and concrete. Penetrates deeply into pavers and stones, enhancing the color and giving the stone a natural sheen and luster. Protects against penetration of water, oil, grease & humidity. High resistance to UV Rays. Available in 1 quart & 1 gallon units.

PREMIUM CRYSTALLIZER

Water based liquid for the crystallization of marble, concrete and terrazzo floors, it adds a very hard surface to the floor. It is not slippery like wax based liquids. By adding a small amount of aluminum oxide, Crystal Premium can be used to crystallize granite floors after they have been polished with diamonds.

Dr. Sal's MAGIC CREME

Polishing Creme for Granite

Finally, a product specifically designed for the Restoration Professional and Building Service Contractor that makes life simple! Dr. Sal's Magic Creme is a brand new floor and wall natural stone restoration product that safely restores and maintains a brilliant shine on marble and granite. It is truly the first of its kind. The creme contains several compounds and special abrasives that can polish a granite floor or wall AFTER IT HAS BEEN HONED.

SPARKLE POLISHING GEL

granito • granite

High Gloss Polishing Gel for Granite

New Product

Sparkle is a new gel for polishing new granite floors or for repolishing old granite floors that have been dulled by heavy foot traffic. Simple and Quick! Use a single disc machine or a grinding-honing machine. Can be used on smooth material, starting from a 220 grit and above or as an alternative to tin oxide. Sparkle does not contain lead.

LUSTER SPRAY FLOOR POLISH

An optically-enhanced, ready to use spray polish suitable for use in any floor maintenance program. This product is formulated to clean and repair finishes, leaving behind a brilliant ANTI-SLIP luster that outlasts other products. Normal coverage is 1500-2000 sq ft.

A Winning Combination!

Stone & masonry Stain Remover

Marble Poultice Powder

Removes stains on stones and masonry without etching the surface.

POLISHING POWDERS

Instructions for Use: 5X YELLOW Polishing Powder for Marble - Apply one scoop of 5x (1-3 oz.) to the stone surface to be treated. Apply a small amount of water to the surface until solution reaches a slurry consistency. Do not allow solution to sit or dry on surface. Using a slow speed polishing machine equipped with a tampico brush, felt wheel or nylon pad, buff the polishing solution into the surface. Move the machine slowly and evenly, doing a small, manageable area at a time (10-20 square feet maximum). Add more water or powder as necessary to maintain the slurry. Check polishing process approximately every 15-40 seconds to prevent burn marks and to monitor your progress.

Take care to neutralize completed areas with fresh water and be careful not to let splattered slurry remain on any surrounding surfaces, clothing or machinery.

Instructions for Use: G7 Polishing Powder for Granite - Wash the floor with Multi-clean and/or Multi-strip/Stripper to remove all dirt and traces of old wax residue. Rinse well and wet vac. Spread a handful of G-7 Granite Powder over a small area of the floor. Add water and pass over with a floor polishing machine with steel wool pads to make a slurry. Test a small patch to see if the desired shine has been achieved. Rinse or mop well with clean cold water and wet vac. Allow to dry thoroughly.

Be careful to neutralize completed areas with fresh water and be careful not to let splattered slurry remain on any surrounding surfaces, clothing or machinery.

Instructions for Use: Hot Mix for Polishing light Marbles - Apply one scoop of Hot Mix (1-3 oz.) to the stone surface to be treated. Apply a small amount of water to the surface until solution reaches a slurry consistency. Do not allow solution to sit or dry on surface. Using a slow speed polishing machine equipped with a tampico brush, felt wheel or nylon pad, buff the polishing solution into the surface. Move the machine slowly and evenly, doing a small, manageable area at a time (10-20 square feet maximum). Add more water or powder as necessary to maintain the slurry. Check polishing process approximately every 15-40 seconds to prevent burn marks and to monitor your progress.

Take care to neutralize completed areas with fresh water and be careful not to let splattered slurry remain on any surrounding surfaces, clothing or machinery.

MANZELLA EPOXY PRODUCTS

STONEPOXY QUICK SET & SLOW SET

Stonepoxy is an epoxy setting material used to set marble, granite, engineered stone, brick, metal, steel and ceramic tiles on floors & walls, countertops, showers, outdoor kitchens and much more. Stonepoxy is an excellent moisture barrier for shower applications. Stonepoxy Fast Set remains workable for up to 40 minutes at room temperature with a drying time of 4-6 hours. Stonepoxy Slow-Set remains workable for up to several hours at room temperature with a drying time of 8-10 hours, especially useful in commercial construction applications. Use our special thickening powder to appreciate the versatility of our slow setting epoxy. To set a floor or countertop, add our Stonepoxy Thickening Agent to your mix.

drying time of

RAPIDO

RAPIDO is a two-part, water-clear flowing epoxy that sets-up in 45-60 minutes at 65°F allowing the fabricator to complete edge work in less than half the time it takes using other laminating epoxies.

EPOX SERIES

Two-component PREMIUM Epoxy adhesives designed to bond joints and fill imperfections in granite, marble, and other stones. Excellent adhesive strength. Can be used for interior and exterior applications. Resistant to solvents, alkali and acid. Perfect for filling imperfections in slabs. EPOX5000 is UV Resistant and crystal clear for visible joints and seamless repairs. All available in Knifegrade & Flowing. Size: 1.5
